

LABSANOR™

LINEAR ALKYL BENZENESULPHONIC ACID Grade A, B, C
TU 2481-015-71150986-2011 with Var. 1
CAS № 27176-87-0

Parameter	Value			Test method
	A	B	C	
Active matter, % by weight, not less than	96	90	80	Par. 4.2
Sulfuric acid, % by weight, not more than	1,5	5	15	Par. 4.2
Unsulphonated matter (based on active matter), % by weight, not more than	2	10	-	Par. 4.3
Color, 5% solution, Klett units, not more than	80	100	-	Par. 4.4
Molecular weight, within	319-326	-	-	Par. 4.2.7

PACKAGING:

Steel/plastic barrels (200-250 liters), IBC-containers, specific stainless steel tank-containers with heating system.
When agreed with a customer another package can be used.

APPLICATION:

Raw material for synthesis of alkyl benzene sulphonates (compounding ingredients of synthetic detergents).

Producer:

Zavod sintanolov LLC

606000, Dzerzhinsk, Nizhny Novgorod region, East industrial area, post box 22
